Hiring Manager

Dear Hiring Manager,

RE: APPLICATION FOR ENUMERATOR POSITION

I am writing to express my interest in the Enumerator position to support the STRIDES household survey data collection exercise. I have completed my Bachelor of Science in Telecommunication and Information Technology at Pwani University and am currently awaiting graduation. I am highly motivated to contribute to data collection activities that support research, community development, and evidence-based decision-making.

Through my academic training and practical experience, I have developed strong analytical, communication, and organizational skills that are valuable in field data collection environments. I also completed professional training in Data Analysis at Jenga School of IT, where I gained practical knowledge in data collection, data cleaning, data interpretation, and reporting using digital tools and spreadsheets.

During my industrial attachment at Swahilipot Hub Foundation, I worked in collaborative environments that required professionalism, teamwork, adaptability, and effective communication with individuals from diverse backgrounds. These experiences strengthened my interpersonal skills and my ability to work responsibly and respectfully within community settings.

I am fluent in both English and Kiswahili and possess strong communication skills that would enable me to effectively engage with respondents during household surveys. I am also familiar with the importance of confidentiality, ethical research conduct, accuracy in data collection, and safeguarding principles when handling sensitive information from participants.

I am a disciplined, reliable, and detail-oriented individual capable of working under minimal supervision and adapting quickly to fieldwork environments. I am eager to contribute positively to the STRIDES survey exercise by ensuring accurate, ethical, and high-quality data collection.

Thank you for considering my application. I would appreciate the opportunity to further discuss my suitability for the position and how I can contribute to the success of the survey exercise.

Yours sincerely,

Kelvin Katwai Mutua
